**FASTER, SAFER AND MORE PREDICTABLE  
EXTRACTION OF FRACTURED ROOTS AND  
IMPACTED TEETH. CROWN LENGTHENING.  
AUTOGENOUS BONE HARVESTING. SINUS LIFT.  
PERIODONTAL SURGERY. ENDODONTICS.  
RIDGE EXPANSION. IMPLANT REMOVAL**

## ADVANTAGES OF US-II PIEZO SURGERY

- Less trauma to the tissues: Decreased post-op pain and swelling.
- Better buccal bone preservation for implants
- Reduced risk of perforating the sinus membrane
- Less bleeding during surgery due to micro-cavitation effect
- Reduced risk of buccal plate fracture during extractions
- Reduced risk of injury to nerves and blood vessels

"Piezo-surgical techniques are the biggest advance in dental surgery in the past 20 years. The US-II LED is an indispensable device."

Bassel P. Gebrael, DDS, Dip. Perio, FRCD(C)
