

CONEXIS DENTAL SERVICES

The right practice project team can save you tens of thousands of dollars. Our practice project manager Raimund Krulls has 28 years experience building dental offices and has built over 500 clinics. He is available for a free phone consultation before you start.

Here is how Conexis Dental Services can help you LOCATE, DESIGN, BUILD, EQUIP, AND MAINTAIN, AND FINANCE your new dental clinic:

### LOCATE:

We can evaluate potential clinic sites to give you an idea regarding suitability from the perspective of an experienced dental installation technician and help you avoid costly pitfalls in lease negotiations.

The office's surrounding demographics, size, layout and patient ratio are vital considerations when selecting your location. If you are considering relocating, the additional concerns are the moving of equipment and the impact on your present clients' abilities to adapt.

If you are starting from scratch we are even able to help you with your business plan and all the necessary steps to get a successful approval from lenders.

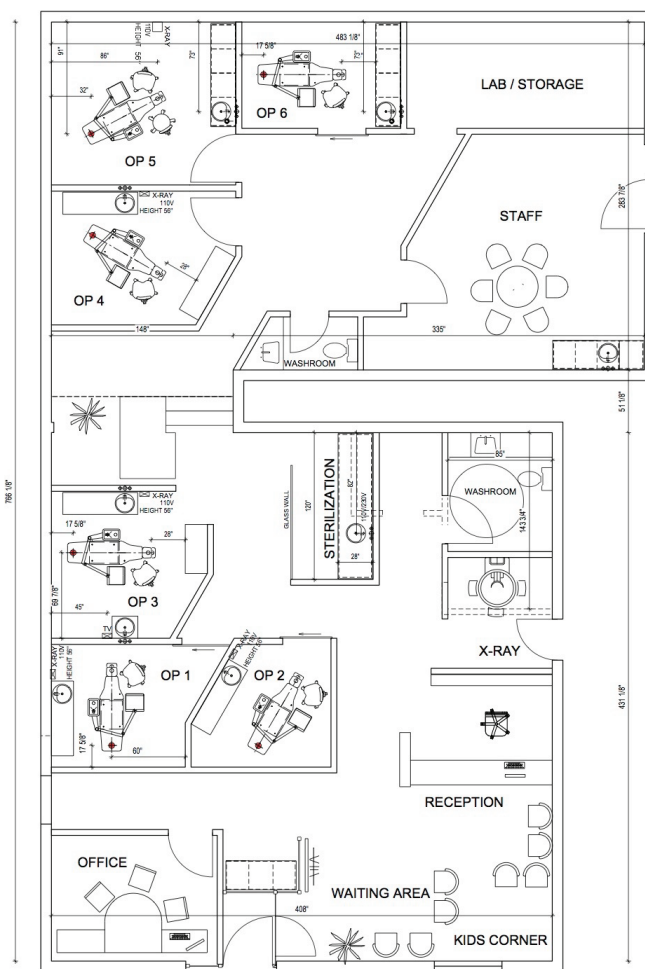

### DESIGN:

Whether it's setting up a new office or renovating an existing one, our knowledgeable and experienced office planner and his design/installation team has the expertise to guide you through the intricacies of building your dream practice. Together with you we will develop an office layout which combines maximum efficiency with the best use of available space. We provide you with a few suggestions to consider before you begin - with 500+ offices built in 28 years we are able to do it!

### BUILD:

This phase is dominated by a relentless barrage of meetings, questions, alterations and inspections essential to guarantee that the final result exceeds your expectations. Our experienced project manager will cooperate with experienced contractors to avoid unforeseen expenses.

We can develop an office layout and create an Auto-CAD plan for tradesmen as a guideline to work - if you use an architect our Auto-CAD system can directly communicate with his system. We can overlook leasehold improvements, usually with a couple of meetings on site to check and confirm or improve. We can complete the installation with a complete team of experienced installers.

CONEXIS DENTAL SERVICES

**EQUIP:**

Accurately assessing your current and future requirements together with considering ever-changing technology is crucial to avoiding potential problems with capacity, utilization, and obsolescence. The CONEXIS TEAM uses its extensive experience in dental education and research to select high value dental equipment to build your office. With a strong scientific background as a guide, we identify products that achieve industry leading performance and we can offer substantial savings to you with factory direct pricing.

We have two office packages to chose from: Standard and Premium. Package components have been chosen for proven reliability and modern minimalist aesthetics and are Health Canada approved. We will work with you to develop a realistic budget for your clinic. Our two very competitive equipment packages give you an overview of the equipment costs without any surprises.

**MAINTAIN:**

Conexis Dental Services provides on-site personalized service for your practice’s maintenance and repair needs through partnership with leading mobile services centres with more than 16 dental service technicians in Ontario. We provide a rapid service and repair response with an emergency loaners and personalized telephone support. We are not doing business for the moment; we are looking for a long term relationship with our clients.

**FINANCE:**

We will work with you to develop a realistic budget for your clinic. Our two very competitive equipment packages give you an overview of the equipment costs without any surprises and our relationship with senior bank executives can get you the best corporate banking terms for your project.

**THE FIRST STEP**

The Chinese philosopher Lao Tze said  
“The journey of a thousand miles begins with one step.”
